Index of Papers Published in 1988

Author Index

A

Aadnoy, B.S.: *Modeling of the Stability of Highly Inclined Boreholes in Anisotropic Rock Formations*, (Tech. Paper SPE 16526) SPEDE Sept., 88 259-268

Aadnoy, B.S. and Chenevert, M.E.: *Authors' Reply to Discussion of Stability of Highly Inclined Boreholes*, (Tech. Paper, Rebuttal SPE 18736) SPEDE Dec., 88 418

Aarrestad, T.V. and Kyllingstad, A.: *An Experimental and Theoretical Study of a Coupling Mechanism Between Longitudinal and Torsional Drillstring Vibrations at the Bit*, (Tech. Paper SPE 15563) SPEDE Mar., 88 12-18

Adams, D.M. and Cavanaugh, J.M.: *Top-Drive Drilling System Evaluation*, (Tech. Paper SPE 16064) SPEDE Mar., 88 43-49

Al-Betairi, E.A. *et al.*: *Multiple Regression Approach To Optimize Drilling Operations in the Arabian Gulf Area*, (Tech. Paper SPE 13694) SPEDE Mar., 88 83-88

Al-Otaibi, S.S. *et al.*: *Multiple Regression Approach To Optimize Drilling Operations in the Arabian Gulf Area*, (Tech. Paper SPE 13694) SPEDE Mar., 88 83-88

Armagost, W.K. and Warren, T.M.: *Laboratory Drilling Performance of PDC Bits*, (Tech. Paper SPE 15617) SPEDE June, 88 125-135

Azar, J.J. *et al.*: *Additive Effectiveness and Contaminant Influence on Fluid-Loss Control in Water-Based Muds*, (Tech. Paper SPE 14703) SPEDE June, 88 195-203

B

Barnett, K.L. *et al.*: *A Model Case History of Infield Drilling and Completion in South Texas*, (Tech. Paper SPE 14424) SPEDE Mar., 88 7-11

Baxter, R.L. and Juvkam-Wold, H.C.: *Discussion of Optimal Spacing for Casing Centralizers*, (Tech. Paper, Discussion SPE 18730) SPEDE Dec., 88 419

Becker, T.E. *et al.*: *Additive Effectiveness and Contaminant Influence on Fluid-Loss Control in Water-Based Muds*, (Tech. Paper SPE 14703) SPEDE June, 88 195-203

Beirute, R.M.: *On-Site Diagnosis of Cement Job Problems: The Concept of Job Signatures*, (Tech. Paper SPE 16649) SPEDE Dec., 88 374-380

Besaisow, A.A. and Payne, M.L.: *A Study of Excitation Mechanisms and Resonances Inducing Bottomhole-Assembly Vibrations*, (Tech. Paper SPE 15560) SPEDE Mar., 88 93-101

Beynet, P.A. *et al.*: *Onboard System Provides Stability, Mooring, and Motion Analysis for Semisubmersible Drilling Operations*, (Tech. Paper SPE 16067) SPEDE June, 88 153-159

Birades, M. and Fenoul, R.: *A Microcomputer Program for Prediction of Bottomhole Assembly Trajectory*, (Tech. Paper SPE 15285) SPEDE June, 88 167-172

Birades, M.: *Static and Dynamic Three-Dimensional Bottomhole Assembly Computer Models*, (Tech. Paper SPE 15466) SPEDE June, 88 160-166

Bourgoyne Jr., A.T. *et al.*: *An Experimental Study of Gas Solubility in Oil-Based Drilling Fluids*, (Tech. Paper SPE 15414) SPEDE Mar., 88 33-42

Bourgoyne Jr., A.T. and Constant, W.D.: *Fracture-Gradient Prediction for Offshore Wells*, (Tech. Paper SPE 15105) SPEDE June, 88 136-140

Bourgoyne, Jr., A.T. *et al.*: *PDC Applications in the Gulf of Mexico With Water-Based Drilling Fluids*, (Tech. Paper SPE 15614) SPEDE June, 88 117-124

Bowling, J.P. *et al.*: *Predicting the Build/Drop Tendency of Rotary Drilling Assemblies*, (Tech. Paper SPE 14768) SPEDE June, 88 177-186

Britton, J.S. and Henderson, G.: *Improving Wellhead Performance With Programmed Cement Shortfall*, (Tech. Paper SPE 16617) SPEDE Dec., 88 381-384

Buchan, R. and Little, M.T.S.: *Advanced Techniques Improve Liner Cementation in North Sea Wells: An Operator's Experience*, (Tech. Paper SPE 15896) SPEDE Sept., 88 281-288

Burgess, T.M. *et al.*: *Predicting the Build/Drop Tendency of Rotary Drilling Assemblies*, (Tech. Paper SPE 14768) SPEDE June, 88 177-186

C

Carlton, L.A. *et al.*: *Methods for Field Monitoring of Oil-Based Drilling Fluids for Hydrogen Sulfide and Water Intrusions*, (Tech. Paper SPE 12120) SPEDE Sept., 88 296-302

Cavanaugh, J.M. and Adams, D.M.: *Top-Drive Drilling System Evaluation*, (Tech. Paper SPE 16064) SPEDE Mar., 88 43-49

Chapman, P.W.: *Ultrasonic Inspection of Rotary-Shouldered Connections*, (Tech. Paper SPE 16073) SPEDE Mar., 88 89-92

Chenevert, M.E. and Aadnoy, B.S.: *Authors' Reply to Discussion of Stability of Highly Inclined Boreholes*, (Tech. Paper, Rebuttal SPE 18736) SPEDE Dec., 88 418

Christian, D.B.: *Planning and Operational Requirements for a Shallow-Objective, High-Angle Well in the Gulf of Mexico*, (Tech. Paper SPE 16168) SPEDE Sept., 88 241-247

Constant, W.D. and Bourgoyne Jr., A.T.: *Fracture-Gradient Prediction for Offshore Wells*, (Tech. Paper SPE 15105) SPEDE June, 88 136-140

Corbett, K.T. and Dawson, R.: *Rubber Drillpipe Protectors Reduce Rotary Torque*, (Tech. Paper SPE 15565) SPEDE Sept., 88 269-274

Crawford, D.W. and Walstad, D.E.: *The Importance of Correct Running and Handling Procedures for Premium Tubular Goods*, (Tech. Paper SPE 16107) SPEDE Dec., 88 363-368

D

Dale, B.A.: *An Experimental Investigation of Fatigue-Crack Growth in Drillstring Tubulars*, (Tech. Paper SPE 15559) SPEDE Dec., 88 356-362

Dawson, R. and Corbett, K.T.: *Rubber Drillpipe Protectors Reduce Rotary Torque*, (Tech. Paper SPE 15565) SPEDE Sept., 88 269-274

Denekas, M.O. *et al.*: *Methods for Field Monitoring of Oil-Based Drilling Fluids for Hydrogen Sulfide and Water Intrusions*, (Tech. Paper SPE 12120) SPEDE Sept., 88 296-302

Dubrule, O. and Nelson, P.H.: *Authors' Reply to Discussion of Evaluation of Directional Survey Errors at Prudhoe Bay*, (Tech. Paper, Rebuttal SPE 18581) SPEDE Sept., 88 335

Dubrule, O. and Nelson, P.H.: *Authors' Reply to Discussion of Evaluation of Directional Survey Errors at Prudhoe Bay*, (Tech. Paper, Rebuttal SPE 18582) SPEDE Sept., 88 335-336

F

Falconer, I.G. *et al.*: *Evaluating Drilling Practice in Deviated Wells With Torque and Weight Data*, (Tech. Paper SPE 16114) SPEDE Sept., 88 248-252

Dale, B.A.: *An Experimental Investigation of Fatigue-Crack Growth in Drillstring Tubulars*, (Tech. Paper SPE 15559) SPEDE Dec., 88 356-362

Dawson, R. and Corbett, K.T.: *Rubber Drillpipe Protectors Reduce Rotary Torque*, (Tech. Paper SPE 15565) SPEDE Sept., 88 269-274

Denekas, M.O. *et al.*: *Methods for Field Monitoring of Oil-Based Drilling Fluids for Hydrogen Sulfide and Water Intrusions*, (Tech. Paper SPE 12120) SPEDE Sept., 88 296-302

Dubrule, O. and Nelson, P.H.: *Authors' Reply to Discussion of Evaluation of Directional Survey Errors at Prudhoe Bay*, (Tech. Paper, Rebuttal SPE 18581) SPEDE Sept., 88 335

Dubrule, O. and Nelson, P.H.: *Authors' Reply to Discussion of Evaluation of Directional Survey Errors at Prudhoe Bay*, (Tech. Paper, Rebuttal SPE 18582) SPEDE Sept., 88 335-336

F

Falconer, I.G. *et al.*: *Evaluating Drilling Practice in Deviated Wells With Torque and Weight Data*, (Tech. Paper SPE 16114) SPEDE Sept., 88 248-252

Fenoul, R. and Birades, M.: *A Microcomputer Program for Prediction of Bottomhole Assembly Trajectory*, (Tech. Paper SPE 15285) SPEDE June, 88 167-172

Fontenot, E.P. and Pejac, R.D.: *Design, Testing, and Planning Considerations for a 20-in. Record Casing String*, (Tech. Paper SPE 13433) SPEDE June, 88 187-194

Foreman, R.D. *et al.*: *Onboard System Provides Stability, Mooring, and Motion Analysis for Semisubmersible Drilling Operations*, (Tech. Paper SPE 16067) SPEDE June, 88 153-159

G

Garrett, R.L. *et al.*: *Methods for Field Monitoring of Oil-Based Drilling Fluids for Hydrogen Sulfide and Water Intrusions*, (Tech. Paper SPE 12120) SPEDE Sept., 88 296-302

Gault, A.D. *et al.*: *PDC Applications in the Gulf of Mexico With Water-Based Drilling Fluids*, (Tech. Paper SPE 15614) SPEDE June, 88 117-124

Gaynor, T.M.: *Downhole Control of Deviation With Steerable Straight-Hole Turbodrills*, (Tech. Paper SPE 14769) SPEDE Mar., 88 50-56

Goodman, H.E. *et al.*: *PDC Applications in the Gulf of Mexico With Water-Based Drilling Fluids*, (Tech. Paper SPE 15614) SPEDE June, 88 117-124

Grimmett, T.T. and Startzman, R.A.: *Optimization of Offshore Field Development To Minimize Investment*, (Tech. Paper SPE 16297) SPEDE Dec., 88 403-410

Guo, X.Z.: *A Preliminary Investigation on the Objective Function of Penetration Cost Applied to Optimized Drilling*, (Tech. Paper SPE 14849) SPEDE Dec., 88 411-417

H

Halsey, G.W. and Kyllingstad, A.: *A Study of Slip/Stick Motion of the Bit*, (Tech. Paper SPE 16659) SPEDE Dec., 88 369-373

Hartmann, A. *et al.*: *Analysis of Mudcake Structures Formed Under Simulated Borehole Conditions*, (Tech. Paper SPE 15413) SPEDE Dec., 88 395-402

Hayatdavoudi, A.: *Downhole Solids Control: A New Theory and Field Practice*, (Tech. Paper SPE 14383) SPEDE Mar., 88 57-62

Henderson, G. and Britton, J.S.: *Improving Wellhead Performance With Programmed Cement Shortfall*, (Tech. Paper SPE 16617) SPEDE Dec., 88 381-384

Hirshberg, A.J. *et al.*: *Surface-Casing Strain Capacity for North Slope Operations*, (Tech. Paper SPE 16103) SPEDE Sept., 88 289-295

Hoberock, L.L. and Lal, M.: *Solids-Conveyance Dynamics and Shaker Performance*, (Tech. Paper SPE 14389) SPEDE Dec., 88 385-394

J

Jeansonne, J.P. *et al.*: *A Model Case History of Infield Drilling and Completion in South Texas*, (Tech. Paper SPE 14424) SPEDE Mar., 88 7-11

Jogi, P.N. *et al.*: *Predicting the Build/Drop Tendency of Rotary Drilling Assemblies*, (Tech. Paper SPE 14768) SPEDE June, 88 177-186

Jones, M.E. and Stash, S.M: *Williston Basin: An Analysis of Salt Drilling Techniques for Brine-Based Drilling-Fluid Systems*, (Tech. Paper SPE 15152) SPEDE Mar., 88 19-32

Juvkam-Wold, H.C. and Baxter, R.L.: *Discussion of Optimal Spacing for Casing Centralizers*, (Tech. Paper, Discussion SPE 18730) SPEDE Dec., 88 419

K

Kendle, D.W. and Lutz, T.S.: *Interactive Computer Graphics System Improves Planning of Directionally Drilled Wells in the East Wilmington Field*, (Tech. Paper SPE 16173) SPEDE June, 88 173-176

Knowlton, H. *et al.*: *PDC Applications in the Gulf of Mexico With Water-Based Drilling Fluids*, (Tech. Paper SPE 15614) SPEDE June, 88 117-124

Kopcso, D.P. *et al.*: *An Experimental Study of Gas Solubility in Oil-Based Drilling Fluids*, (Tech. Paper SPE 15414) SPEDE Mar., 88 33-42

Kwon, Y.W.: *Analysis of Helical Buckling*, (Tech. Paper SPE 14729) SPEDE June, 88 211-216

Kyllingstad, A. and Aarrestad, T.V.: *An Experimental and Theoretical Study of a Coupling Mechanism Between Longitudinal and Torsional Drillstring Vibrations at the Bit*, (Tech. Paper SPE 15563) SPEDE Mar., 88 12-18

Kyllingstad, A. and Halsey, G.W.: *A Study of Slip/Stick Motion of the Bit*, (Tech. Paper SPE 16659) SPEDE Dec., 88 369-373

L

Lal, M. and Hoberock, L.L.: *Solids-Conveyance Dynamics and Shaker Performance*, (Tech. Paper SPE 14389) SPEDE Dec., 88 385-394

Lesage, M. *et al.*: *Evaluating Drilling Practice in Deviated Wells With Torque and Weight Data*, (Tech. Paper SPE 16114) SPEDE Sept., 88 248-252

Lino, R.Q.: *Increased ROP of Jet Drilling From Improvement of the Bottomhole Flow Field*, (Tech. Paper SPE 14857) SPEDE June, 88 204-210

Little, M.T.S. and Buchan, R.: *Advanced Techniques Improve Liner Cementation in North Sea Wells: An Operator's Experience*, (Tech. Paper SPE 15896) SPEDE Sept., 88 281-288

Lummus, J.L. *et al.*: *Additive Effectiveness and Contaminant Influence on Fluid-Loss Control in Water-Based Muds*, (Tech. Paper SPE 14703) SPEDE June, 88 195-203

Lutz, T.S. and Kendle, D.W.: *Interactive Computer Graphics System Improves Planning of Directionally Drilled Wells in the East Wilmington Field*, (Tech. Paper SPE 16173) SPEDE June, 88 173-176

M

Marsh, J.: *Discussion of Evaluation of Directional Survey Errors at Prudhoe Bay*, (Tech. Paper, Discussion SPE 17467) SPEDE Mar., 88 103

Marx, C. *et al.*: *Analysis of Mudcake Structures Formed Under Simulated Borehole Conditions*, (Tech. Paper SPE 15413) SPEDE Dec., 88 395-402

Mitchell, R.F.: *Dynamic Surge/Swab Pressure Predictions*, (Tech. Paper SPE 16156) SPEDE Sept., 88 325-333

Mitchell, R.F.: *New Concepts for Helical Buckling*, (Tech. Paper SPE 15470) SPEDE Sept., 88 303-310

Mitchell, R.K. *et al.*: *A Model Case History of Infield Drilling and Completion in South Texas*, (Tech. Paper SPE 14424) SPEDE Mar., 88 7-11

Monger, T.G. *et al.*: *An Experimental Study of Gas Solubility in Oil-Based Drilling Fluids*, (Tech. Paper SPE 15414) SPEDE Mar., 88 33-42

Moussa, M.M. *et al.*: *Multiple Regression Approach To Optimize Drilling Operations in the Arabian Gulf Area*, (Tech. Paper SPE 13694) SPEDE Mar., 88 83-88

Moyer, M.C. *et al.*: *Surface-Casing Strain Capacity for North Slope Operations*, (Tech. Paper SPE 16103) SPEDE Sept., 88 289-295

Myers II, R.L. and Smalling, D.A.: *A Drilling Model for Young Offshore Louisiana and Texas Trends*, (Tech. Paper SPE 14785) SPEDE June, 88 141-152

N

Nelson, P.H. and Dubrule, O.: *Authors' Reply to Discussion of Evaluation of Directional Survey Errors at Prudhoe Bay*, (Tech. Paper, Rebuttal SPE 18581) SPEDE Sept., 88 335

Nelson, P.H. and Dubrule, O.: *Authors' Reply to Discussion of Evaluation of Directional Survey Errors at Prudhoe Bay*, (Tech. Paper, Rebuttal SPE 18582) SPEDE Sept., 88 335-336

Neumann, H.-J. *et al.*: *Analysis of Mudcake Structures Formed Under Simulated Borehole Conditions*, (Tech. Paper SPE 15413) SPEDE Dec., 88 395-402

Nyland, T. *et al.*: *Additive Effectiveness and Contaminant Influence on Fluid-Loss Control in Water-Based Muds*, (Tech. Paper SPE 14703) SPEDE June, 88 195-203

O

O'Bryan, P.L. *et al.*: *An Experimental Study of Gas Solubility in Oil-Based Drilling Fluids*, (Tech. Paper SPE 15414) SPEDE Mar., 88 33-42

Ozerler, M. *et al.*: *Analysis of Mudcake Structures Formed Under Simulated Borehole Conditions*, (Tech. Paper SPE 15413) SPEDE Dec., 88 395-402

P

Park, L.S.: *A New Chrome-Free Lignosulfonate Thinner: Performance Without Environmental Concerns*, (Tech. Paper SPE 16281) SPEDE Sept., 88 311-314

Payne, M.L. and Besaisow, A.A.: *A Study of Excitation Mechanisms and Resonances Inducing Bottomhole-Assembly Vibrations*, (Tech. Paper SPE 15560) SPEDE Mar., 88 93-101

Pejac, R.D. and Fontenot, E.P.: *Design, Testing, and Planning Considerations for a 20-in. Record Casing String*, (Tech. Paper SPE 13433) SPEDE June, 88 187-194

R

Rickenbach, R.M. *et al.*: *Surface-Casing Strain Capacity for North Slope Operations*, (Tech. Paper SPE 16103) SPEDE Sept., 88 289-295

Roberts, E.W.: *Operational Aspects of Extended High-Pressure Well Tests From a Floater*, (Tech. Paper SPE 16088) SPEDE Sept., 88 253-258

S

Sabins, F.L. and Wilson, M.A.: *A Laboratory Investigation of Cementing Horizontal Wells*, (Tech. Paper SPE 16928) SPEDE Sept., 88 275-280

Schouten, F.C. and Stewart, R.B.: *Gas Invasion and Migration in Cemented Annuli: Causes and Cures*, (Tech. Paper SPE 14779) SPEDE Mar., 88 77-82

Seidl, L.H. *et al.*: *Onboard System Provides Stability, Mooring, and Motion Analysis for Semisubmersible Drilling Operations*, (Tech. Paper SPE 16067) SPEDE June, 88 153-159

Shen, Z.H. and Sun, Q.X.: *Study of Pressure Attenuation of a Submerged, Nonfree Jet and a Method of Calculation for Bottomhole Hydraulic Parameters*, (Tech. Paper SPE 14869) SPEDE Mar., 88 69-76

Simison, H.: *Discussion of Laboratory Study of Diamond-Bit Hydraulic Lift and Field Application of Diamond-Bit Hydraulic-Lift Principles*, (Tech. Paper, Discussion SPE 17470) SPEDE Mar., 88 102

Simison, H.: *Discussion of Stability of Highly Inclined Boreholes*, (Tech. Paper, Discussion SPE 18596) SPEDE Dec., 88 418

Singhal, S.N. *et al.*: *Onboard System Provides Stability, Mooring, and Motion Analysis for Semisubmersible Drilling Operations*, (Tech. Paper SPE 16067) SPEDE June, 88 153-159

Smalling, D.A. and Myers II, R.L.: *A Drilling Model for Young Offshore Louisiana and Texas Trends*, (Tech. Paper SPE 14785) SPEDE June, 88 141-152

Startzman, R.A. and Grimmett, T.T.: *Optimization of Offshore Field Development To Minimize Investment*, (Tech. Paper SPE 16297) SPEDE Dec., 88 403-410

Stash, S.M and Jones, M.E.: *Williston Basin: An Analysis of Salt Drilling Techniques for Brine-Based Drilling-Fluid Systems*, (Tech. Paper SPE 15152) SPEDE Mar., 88 19-32

Stewart, R.B. and Schouten, F.C.: *Gas Invasion and Migration in Cemented Annuli: Causes and Cures*, (Tech. Paper SPE 14779) SPEDE Mar., 88 77-82

Sun, Q.X. and Shen, Z.H.: *Study of Pressure Attenuation of a Submerged, Nonfree Jet and a Method of Calculation for Bottomhole Hydraulic Parameters*, (Tech. Paper SPE 14869) SPEDE Mar., 88 69-76

T

Thorogood, J.L.: *Discussion of Evaluation of Directional Survey Errors at Prudhoe Bay*, (Tech. Paper, Discussion SPE 18557) SPEDE Sept., 88 334

W

Walstad, D.E. and Crawford, D.W.: *The Importance of Correct Running and Handling Procedures for Premium Tubular Goods*, (Tech. Paper SPE 16107) SPEDE Dec., 88 363-368

Warren, T.M. and Armagost, W.K.: *Laboratory Drilling Performance of PDC Bits*, (Tech. Paper SPE 15617) SPEDE June, 88 125-135

Warren, T.M. and Winters, W.J.: *Authors' Reply to Discussion of Laboratory Study of Diamond-Bit Hydraulic Lift and Field Application of Diamond-Bit Hydraulic-Lift Principles*, (Tech. Paper, Rebuttal SPE 17553) SPEDE Mar., 88 102

Weido, V.C.: *An Overview of Free-Point Tools*, (Tech. Paper SPE 16154) SPEDE Dec., 88 351-355

Wick, C. *et al.*: *Evaluating Drilling Practice in Deviated Wells With Torque and Weight Data*, (Tech. Paper SPE 16114) SPEDE Sept., 88 248-252

Wilson, M.A. and Sabins, F.L.: *A Laboratory Investigation of Cementing Horizontal Wells*, (Tech. Paper SPE 16928) SPEDE Sept., 88 275-280

Winters, W.J. and Warren, T.M.: *Authors' Reply to Discussion of Laboratory Study of Diamond-Bit Hydraulic Lift and Field Application of Diamond-Bit Hydraulic-Lift Principles*, (Tech. Paper, Rebuttal SPE 17553) SPEDE Mar., 88 102

Subject Index

A

Additives
- Effectiveness and contaminant influence on fluid-loss control; water-based muds, (Tech. Paper SPE 14703) SPEDE Jun. 88, 195-203

Alaska
- Bering Sea: semisubmersible drilling operations: onboard system provides stability, mooring, and motion analysis for, (Tech. Paper SPE 16067) SPEDE Jun. 88, 153-159
- Downhole control of deviation with steerable straight-hole turbodrills, (Tech. Paper SPE 14769) SPEDE Mar. 88, 50-56
- North Slope operations: surface-casing strain capacity for, (Tech. Paper SPE 16103) SPEDE Sept. 88, 289-295
- Prudhoe Bay field: evaluation of directional survey errors; authors' reply to discussion, (Tech. Paper, Rebuttal SPE 18582) SPEDE Sept. 88, 335-336
- Prudhoe Bay field: evaluation of directional survey errors; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18581) SPEDE Sept. 88, 335
- Prudhoe Bay field: evaluation of directional survey errors; discussion of, (Tech. Paper, Discussion SPE 17467) SPEDE Mar. 88, 103
- Prudhoe Bay field: evaluation of directional survey errors; discussion of, (Tech. Paper, Discussion SPE 18557) SPEDE Sept. 88, 334

Anisotropic Reservoirs
- Modeling of stability of highly inclined boreholes in, (Tech. Paper SPE 16526) SPEDE Sept. 88, 259-268

Annulus
- Cemented: gas invasion and migration in; causes and cures, (Tech. Paper SPE 14779) SPEDE Mar. 88, 77-82

Arabian Gulf
- Area: multiple regression approach to optimize drilling operations, (Tech. Paper SPE 13694) SPEDE Mar. 88, 83-88

Attenuation
- Pressure: study of a submerged, nonfree jet and a method of calculation for bottomhole hydraulic parameters, (Tech. Paper SPE 14869) SPEDE Mar. 88, 69-76

B

Bering Sea
- See Alaska

Bits
- Coupling mechanism between longitudinal and torsional drillstring vibrations at: experimental and theoretical study, (Tech. Paper SPE 15563) SPEDE Mar. 88, 12-18
- Diamond: field application of hydraulic-lift principles; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 17553) SPEDE Mar. 88, 102
- Diamond: field application of hydraulic-lift principles; discussion of, (Tech. Paper, Discussion SPE 17470) SPEDE Mar. 88, 102
- Diamond: laboratory study of hydraulic lift; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 17553) SPEDE Mar. 88, 102
- Diamond: laboratory study of hydraulic lift; discussion of, (Tech. Paper, Discussion SPE 17470) SPEDE Mar. 88, 102
- Hydraulics: drilling model for young offshore Louisiana and Texas trends, (Tech. Paper SPE 14785) SPEDE Jun. 88, 141-152
- PDC: applications in Gulf of Mexico with water-based drilling fluids, (Tech. Paper SPE 15614) SPEDE Jun. 88, 117-124
- PDC: laboratory drilling performance of, (Tech. Paper SPE 15617) SPEDE Jun. 88, 125-135
- Roller cone and PCD: model case history of infield drilling and completion in south Texas, (Tech. Paper SPE 14424) SPEDE Mar. 88, 7-11
- Study of slip/stick motion, (Tech. Paper SPE 16659) SPEDE Dec. 88, 369-373

Boreholes
- Highly inclined: modeling of stability in anisotrophic rock formations, (Tech. Paper SPE 16526) SPEDE Sept. 88, 259-268
- Highly inclined: stability of; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18736) SPEDE Dec. 88, 418
- Highly inclined: stability of; discussion of, (Tech. Paper, Discussion SPE 18596) SPEDE Dec. 88, 418
- Simulated conditions: analysis of mudcake structures formed under, (Tech. Paper SPE 15413) SPEDE Dec. 88, 395-402

Bottomhole Assemblies
- Computer model: static and dynamic three-dimensional, (Tech. Paper SPE 15466) SPEDE Jun. 88, 160-166
- Rotary drilling: predicting build/drop tendency of, (Tech. Paper SPE 14768) SPEDE Jun. 88, 177-186
- Trajectory: microcomputer program for prediction of, (Tech. Paper SPE 15285) SPEDE Jun. 88, 167-172
- Vibrations: induced by excitation mechanisms and resonances; study of, (Tech. Paper SPE 15560) SPEDE Mar. 88, 93-101

Boundary Conditions
- In new concepts for helical buckling, (Tech. Paper SPE 15470) SPEDE Sept. 88, 303-310

Brines
- Based drilling-fluid systems: analysis of salt drilling techniques; Williston basin, (Tech. Paper SPE 15152) SPEDE Mar. 88, 19-32

Buckling
- Helical: analysis of, (Tech. Paper SPE 14729) SPEDE Jun. 88, 211-216
- Helical: new concepts for, (Tech. Paper SPE 15470) SPEDE Sept. 88, 303-310

C

Calcium
- Of highly inclined boreholes: discussion of, (Tech. Paper, Discussion SPE 18596) SPEDE Dec. 88, 418

California
- East Wilmington field: interactive computer graphics system improves planning of directionally drilled wells, (Tech. Paper SPE 16173) SPEDE Jun. 88, 173-176

Caliper Logging
- In analysis of salt drilling techniques for brine-based drilling-fluid systems: Williston basin, (Tech. Paper SPE 15152) SPEDE Mar. 88, 19-32

Capacity
- Strain: of surface casing; for North Slope operations, (Tech. Paper SPE 16103) SPEDE Sept. 88, 289-295

Case Histories
- High-pressure extended well tests: operational aspects of, (Tech. Paper SPE 16088) SPEDE Sept. 88, 253-258
- Of infield drilling and completion: south Texas, (Tech. Paper SPE 14424) SPEDE Mar. 88, 7-11
- Of multiple regression approach to optimize drilling operations: Arabian Gulf area, (Tech. Paper SPE 13694) SPEDE Mar. 88, 83-88

Of shallow-objective, high-angle well in Gulf of Mexico: planning and operational requirements, (Tech. Paper SPE 16168) SPEDE Sept. 88, 241-247

Casing

20-in. record string: design, testing, and planning considerations for, (Tech. Paper SPE 13433) SPEDE Jun. 88, 187-194

Centralizers: optimal spacing for; discussion of, (Tech. Paper, Discussion SPE 18730) SPEDE Dec. 88, 419

Helical buckling: analysis of, (Tech. Paper SPE 14729) SPEDE Jun. 88, 211-216

Surface: strain capacity for North Slope operations, (Tech. Paper SPE 16103) SPEDE Sept. 88, 289-295

Cementation

Of liner in North Sea wells: advanced techniques improve; an operator's experience, (Tech. Paper SPE 15896) SPEDE Sept. 88, 281-288

Cementing

Horizontal wells: laboratory investigation of, (Tech. Paper SPE 16928) SPEDE Sept. 88, 275-280

Procedures: design, testing, and planning considerations for 20-in. record casing string, (Tech. Paper SPE 13433) SPEDE Jun. 88, 187-194

Cements

Diagnosis of job problems on-site: concept of job signatures, (Tech. Paper SPE 16649) SPEDE Dec. 88, 374-380

Gas invasion and migration in cemented annuli: causes and cures, (Tech. Paper SPE 14779) SPEDE Mar. 88, 77-82

Programmed shortfall: improving wellhead performance with, (Tech. Paper SPE 16617) SPEDE Dec. 88, 381-384

Centrifuge

Dewatering-process study: modern solids control, (Tech. Paper SPE 16098) SPEDE Sept. 88, 315-324

Channeling

Of cement: on-site diagnosis of problem: concept of job signatures, (Tech. Paper SPE 16649) SPEDE Dec. 88, 374-380

China

North China oil field: jet drilling; hydraulic programs for maximum hydraulic horsepower and impace force on rock surface of hole bottom, (Tech. Paper SPE 14851) SPEDE Mar. 88, 63-68

Shengli oil field: jet drilling; hydraulic programs for maximum hydraulic horsepower and impact force on rock surface of hole bottom, (Tech. Paper SPE 14851) SPEDE Mar. 88, 63-68

Sichuan Central oil field: increased ROP of jet drilling from improvement of bottomhole flow field, (Tech. Paper SPE 14857) SPEDE Jun. 88, 204-210

Zhong Yuan Oil field: preliminary investigation on objective function of penetration cost applied to optimized drilling, (Tech. Paper SPE 14849) SPEDE Dec. 88, 411-417

Completion

And infield drilling: model case history in South Texas, (Tech. Paper SPE 14424) SPEDE Mar. 88, 7-11

Of shallow-objective, high-angle well in Gulf of Mexico: planning and operational requirements, (Tech. Paper SPE 16168) SPEDE Sept. 88, 241-247

Computers

Interactive graphics system: improves planning of directionally drilled wells; East Wilmington field, (Tech. Paper SPE 16173) SPEDE Jun. 88, 173-176

Onboard system provides stability, mooring, and motion analysis: semisubmersible drilling, (Tech. Paper SPE 16067) SPEDE Jun. 88, 153-159

Programming: optimization of offshore field development to minimize investment, (Tech. Paper SPE 16297) SPEDE Dec. 88, 403-410

Static and dynamic three-dimensioinal bottomhole assembly model, (Tech. Paper SPE 15466) SPEDE Jun. 88, 160-166

Contamination

And additive effectiveness: influence on fluid-loss control in water-based muds, (Tech. Paper SPE 14703) SPEDE Jun. 88, 195-203

Controls

Downhole solids: new theory and field practice, (Tech. Paper SPE 14383) SPEDE Mar. 88, 57-62

Downhole: of deviation with steerable straight-hole turbodrills, (Tech. Paper SPE 14769) SPEDE Mar. 88, 50-56

Fluid-loss: in water-based muds; additive effectiveness and contaminant influence, (Tech. Paper SPE 14703) SPEDE Jun. 88, 195-203

Of modern solids: centrifuge dewatering-process study, (Tech. Paper SPE 16098) SPEDE Sept. 88, 315-324

Correlations

Empirical: for predicting gas solubility in oil-based drilling fluids, (Tech. Paper SPE 15414) SPEDE Mar. 88, 33-42

Fracture-gradient: prediction for offshore wells, (Tech. Paper SPE 15105) SPEDE Jun. 88, 136-140

Costs

Of penetration: applied to optimized drilling; preliminary investigation on objective function of, (Tech. Paper SPE 14849) SPEDE Dec. 88, 411-417

Savings: with top-drive drilling system, (Tech. Paper SPE 16064) SPEDE Mar. 88, 43-49

Couplings

Mechanism between longitudinal and torsional drillstring vibrations at the bit: experimental and theoretical study, (Tech. Paper SPE 15563) SPEDE Mar. 88, 12-18

Cuttings

Downhole solids control: new theory and field practice, (Tech. Paper SPE 14383) SPEDE Mar. 88, 57-62

D

Damage

Of premium tubular goods: importance of correct running and handling procedures for, (Tech. Paper SPE 16107) SPEDE Dec. 88, 363-368

Data

On dynamic vibration of bottomhole assembly: study of excitation mechanisms and resonances inducing, (Tech. Paper SPE 15560) SPEDE Mar. 88, 93-101

Torque and weight: evaluating drilling practice in deviated wells with, (Tech. Paper SPE 16114) SPEDE Sept. 88, 248-252

Degradation

Chemical and thermal: of drilling fluids; analysis of mudcake structures formed under simulated borehole conditions, (Tech. Paper SPE 15413) SPEDE Dec. 88, 395-402

Design

And testing and planning considerations for 20-in. record casing string, (Tech. Paper SPE 13433) SPEDE Jun. 88, 187-194

Cement slurry: for cementing of horizontal wells; laboratory investigation of, (Tech. Paper SPE 16928) SPEDE Sept. 88, 275-280

Of PDC bits: laboratory drilling performance, (Tech. Paper SPE 15617) SPEDE Jun. 88, 125-135

Of free-point tools: overview of, (Tech. Paper SPE 16154) SPEDE Dec. 88, 351-355

Detection
Of ultrasonic system of inspection: for rotary-shouldered connections, (Tech. Paper SPE 16073) SPEDE Mar. 88, 89-92
Developments
Of free-point tools: overview of, (Tech. Paper SPE 16154) SPEDE Dec. 88, 351-355
Of offshore field: optimization to minimize investment, (Tech. Paper SPE 16297) SPEDE Dec. 88, 403-410
Diamond
Bit: field application of hydraulic-lift principles; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 17553) SPEDE Mar. 88, 102
Bit: field application of hydraulic-lift principles; discussion of, (Tech. Paper, Discussion SPE 17470) SPEDE Mar. 88, 102
Bit: laboratory study of hydraulic lift; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 17553) SPEDE Mar. 88, 102
Bit: laboratory study of hydraulic lift; discussion of, (Tech. Paper, Discussion SPE 17470) SPEDE Mar. 88, 102
Polycrystalline compact bits: applications in Gulf of Mexico with water-based drilling fluids, (Tech. Paper SPE 15614) SPEDE Jun. 88, 117-124
Polycrystalline compact bits: laboratory drilling performance, (Tech. Paper SPE 15617) SPEDE Jun. 88, 125-135
Directional Surveys
Errors: evaluation at Prudhoe Bay, Alaska; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18581) SPEDE Sept. 88, 335
Errors: evaluation at Prudhoe Bay, Alaska; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18582) SPEDE Sept. 88, 335-336
Errors: evaluation at Prudhoe Bay, Alaska; discussion of, (Tech. Paper, Discussion SPE 17467) SPEDE Mar. 88, 103
Errors: evaluation at Prudhoe Bay, Alaska; discussion of, (Tech. Paper, Discussion SPE 18557) SPEDE Sept. 88, 334
Directional Wells
Downhole control of deviation with steerable straight-hole turbodrills, (Tech. Paper SPE 14769) SPEDE Mar. 88, 50-56
Evaluating drilling practice with torque and weight data, (Tech. Paper SPE 16114) SPEDE Sept. 88, 248-252
In Gulf of Mexico: planning and operational requirements for a shallow-objective high-angle well, (Tech. Paper SPE 16168) SPEDE Sept. 88, 241-247
Interactive computer graphics system improves drilling planning: East Wilmington field, (Tech. Paper SPE 16173) SPEDE Jun. 88, 173-176
Rotary drilling assemblies: predicting build/drop tendency of, (Tech. Paper SPE 14768) SPEDE Jun. 88, 177-186
Drill Bit
Study of slip/stick motion, (Tech. Paper SPE 16659) SPEDE Dec. 88, 369-373
Drill-Off Data
In-field applications of diamond-bit hydraulic-lift principles; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 17553) SPEDE Mar. 88, 102
In-field applications of diamond-bit hydraulic-lift principles; discussion of, (Tech. Paper, Discussion SPE 17470) SPEDE Mar. 88, 102
Drilling
Evaluating practice in deviated wells with torque and weight data, (Tech. Paper SPE 16114) SPEDE Sept. 88, 248-252
Drilling Fluids
Brine-based systems: analysis of salt drilling techniques for; Williston basin, (Tech. Paper SPE 15152) SPEDE Mar. 88, 19-32
Model case history of infield drilling and completion in south Texas, (Tech. Paper SPE 14424) SPEDE Mar. 88, 7-11
Modern solids control: centrifuge dewatering-process study, (Tech. Paper SPE 16098) SPEDE Sept. 88, 315-324
Mudcake structures formed under simulated borehole conditions: analysis of, (Tech. Paper SPE 15413) SPEDE Dec. 88, 395-402
New chrome-free lignosulfonate thinner for: performance without invironmental concerns, (Tech. Paper SPE 16281) SPEDE Sept. 88, 311-314
Oil-based: experimental study of gas solubility in, (Tech. Paper SPE 15414) SPEDE Mar. 88, 33-42
Oil-based: methods for field monitoring for H2S and H2O intrusions, (Tech. Paper SPE 12120) SPEDE Sept. 88, 296-302
Solids-conveyance dynamics: and shale shaker performance, (Tech. Paper SPE 14389) SPEDE Dec. 88, 385-394
Water-based: PDC applications in Gulf of Mexico, (Tech. Paper SPE 15614) SPEDE Jun. 88, 117-124
Drillpipe
Rubber protectors reduce rotary torque, (Tech. Paper SPE 15565) SPEDE Sept. 88, 269-274
Drillstring
Longitudinal and torsional vibration at the bit: experimental and theoretical study of a coupling mechanism between, (Tech. Paper SPE 15563) SPEDE Mar. 88, 12-18
Tubulars: experimental investigation of fatigue-crack growth in, (Tech. Paper SPE 15559) SPEDE Dec. 88, 356-362
Dynamics
And static: three-dimensional bottomhole assembly computer model, (Tech. Paper SPE 15466) SPEDE Jun. 88, 160-166
Solids-conveyance: and shaker performance, (Tech. Paper SPE 14389) SPEDE Dec. 88, 385-394
Surge/swab pressure predictions, (Tech. Paper SPE 16156) SPEDE Sept. 88, 325-333

E

East Wilmington Field
See California
Environmental Effects
Performance concerns removed by new chrome-free lignosulfonate thinner, (Tech. Paper SPE 16281) SPEDE Sept. 88, 311-314
Environments
Hostile: importance of correct running and handling procedures for premium tubular goods, (Tech. Paper SPE 16107) SPEDE Dec. 88, 363-368
Equipment
Casing centralizers: optimal spacing for; discussion of, (Tech. Paper, Discussion SPE 18730) SPEDE Dec. 88, 419
Coupling mechanism: between longitudinal and torsional drillstring vibrations at the bit; experimental and theoretical study, (Tech. Paper SPE 15563) SPEDE Mar. 88, 12-18
Drillstring tubulars: experimental investigation of fatigue-crack growth in, (Tech. Paper SPE 15559) SPEDE Dec. 88, 356-362
Free-point tools: overview of, (Tech. Paper SPE 16154) SPEDE Dec. 88, 351-355
Rubber drillpipe protectors: rotary torque reduced by, (Tech. Paper SPE 15565) SPEDE Sept. 88, 269-274

Solids-conveyance dynamics and shale shaker performance, (Tech. Paper SPE 14389) SPEDE Dec. 88, 385-394
Steerable straight-hole turbodrills: downhole control of deviation with, (Tech. Paper SPE 14769) SPEDE Mar. 88, 50-56
Tubular goods, premium type: importance of correct running and handling procedures for, (Tech. Paper SPE 16107) SPEDE Dec. 88, 363-368

Error Analysis
Of directional surveys: evaluation of Prudhoe Bay, Alaska, discussion of, (Tech. Paper, Discussion SPE 17467) SPEDE Mar. 88, 103
Of directional surveys: evaluation of Prudhoe Bay, Alaska; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18581) SPEDE Sept. 88, 335
Of directional surveys: evaluation of Prudhoe Bay, Alaska; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18582) SPEDE Sept. 88, 335-336
Of directional surveys: evaluation of Prudhoe Bay, Alaska; discussion of, (Tech. Paper, Discussion SPE 18557) SPEDE Sept. 88, 334

Evaluations
Of a top-drive drilling system, (Tech. Paper SPE 16064) SPEDE Mar. 88, 43-49
Of directional survey errors: Prudhoe Bay, Alaska; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18581) SPEDE Sept. 88, 335
Of directional survey errors: Prudhoe Bay, Alaska; discussion of, (Tech. Paper, Discussion SPE 17467) SPEDE Mar. 88, 103
Of directional survey errors: Prudhoe Bay, Alaska; discussion of, (Tech. Paper, Discussion SPE 18557) SPEDE Sept. 88, 334
Of directional survey errors: Prudhoe Bay, alaska; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18582) SPEDE Sept. 88, 335-336
Of drilling practice in deviated wells with torque and weight data, (Tech. Paper SPE 16114) SPEDE Sept. 88, 248-252

Excitation Mechanism
And resonances inducing bottomhole-assembly vibrations: study of, (Tech. Paper SPE 15560) SPEDE Mar. 88, 93-101

F

Fatigue
Crack growth in drillstring tubulars: experimental investigation of, (Tech. Paper SPE 15559) SPEDE Dec. 88, 356-362

Field Applications
Of diamond-bit hydraulic-lift principles: authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 17553) SPEDE Mar. 88, 102
Of diamond-bit hydraulic-lift principles; discussion of, (Tech. Paper, Discussion SPE 17470) SPEDE Mar. 88, 102
Of evaluating drilling practice in deviated wells with torque and weight data, (Tech. Paper SPE 16114) SPEDE Sept. 88, 248-252
Of gas solubility in oil-based drilling fluids, (Tech. Paper SPE 15414) SPEDE Mar. 88, 33-42
Of static and dynamic three-dimensional bottomhole assembly computer model, (Tech. Paper SPE 15466) SPEDE Jun. 88, 160-166
Optimal spacing for casing centralizers: discussion of, (Tech. Paper, Discussion SPE 18730) SPEDE Dec. 88, 419

Field Case History
Of cement job problems: concept of job signatures for on-site diagnosis, (Tech. Paper SPE 16649) SPEDE Dec. 88, 374-380

Field Tests
Multiple regression approach to optimize drilling operations: Arabian Gulf area, (Tech. Paper SPE 13694) SPEDE Mar. 88, 83-88
Of correct running and handling procedures for premium tubular goods: importance of, (Tech. Paper SPE 16107) SPEDE Dec. 88, 363-368
Of downhole solids control: new theory and field practice, (Tech. Paper SPE 14383) SPEDE Mar. 88, 57-62
Of dynamic surge/swab pressure predictions, (Tech. Paper SPE 16156) SPEDE Sept. 88, 325-333
Of field drilling and completion: model case history in south Texas, (Tech. Paper SPE 14424) SPEDE Mar. 88, 7-11
Of increased ROP of jet drilling from improvement of bottomhole flow field, (Tech. Paper SPE 14857) SPEDE Jun. 88, 204-210
Of rotary torque reduction with rubber drillpipe protectors, (Tech. Paper SPE 15565) SPEDE Sept. 88, 269-274
Of rotary-shouldered connections: ultrasonic inspection of, (Tech. Paper SPE 16073) SPEDE Mar. 88, 89-92
Of solids conveyance-dynamics and shaker performance, (Tech. Paper SPE 14389) SPEDE Dec. 88, 385-394
Of steerable straight-hole turbodrills: downhole control of deviation with, (Tech. Paper SPE 14769) SPEDE Mar. 88, 50-56

Filter Cakes
Structures formed under simulated borehole conditions: analysis of, (Tech. Paper SPE 15413) SPEDE Dec. 88, 395-402

Filtration
Invasion: additive effectiveness and contaminant influence on fluid-loss control: water-based muds, (Tech. Paper SPE 14703) SPEDE Jun. 88, 195-203

Floating Vessels
Operational aspects of extended high-pressure well tests from, (Tech. Paper SPE 16088) SPEDE Sept. 88, 253-258

Fluid Flow
Improvement of bottomhole flow field: increased ROP of jet drilling from, (Tech. Paper SPE 14857) SPEDE Jun. 88, 204-210

Fluid Loss
Control in water-based muds: additive effectiveness and contaminant influence on, (Tech. Paper SPE 14703) SPEDE Jun. 88, 195-203

Forces
Impact: and maximum hydraulic horsepower on rock surface of hole bottom in jet drilling; hydraulic programs for, (Tech. Paper SPE 14851) SPEDE Mar. 88, 63-68

Formation Fractures
Gradient prediction for offshore wells, (Tech. Paper SPE 15105) SPEDE Jun. 88, 136-140

Formulation
New chrome-free lignosulfonate: thinner performs without environmental concerns, (Tech. Paper SPE 16281) SPEDE Sept. 88, 311-314

Fractures
Gradient prediction for offshore wells, (Tech. Paper SPE 15105) SPEDE Jun. 88, 136-140

France
Field results: microcomputer program for prediction of bottomhole assembly trajectory, (Tech. Paper SPE 15285) SPEDE Jun. 88, 167-172

Free-Point Tools
An overview of, (Tech. Paper SPE 16154) SPEDE Dec. 88, 351-355
Functions
Penetration-cost-objective: applied to optimized drilling; preliminary investigation on, (Tech. Paper SPE 14849) SPEDE Dec. 88, 411-417

G

Gas Condensates
Wells: extended high-pressure tests; operational aspects from a floater, (Tech. Paper SPE 16088) SPEDE Sept. 88, 253-258
Gases
Invasion: and migration in cemented annuli; causes and cures, (Tech. Paper SPE 14779) SPEDE Mar. 88, 77-82
Gel Strength
Of drilling fluid: influence on dynamic filter-cake structures: analysis under simulated borehole conditions, (Tech. Paper SPE 15413) SPEDE Dec. 88, 395-402
Graphic Techniques
Interactive computer system: improves planning of directionally drilled wells; East Wilmington field, (Tech. Paper SPE 16173) SPEDE Jun. 88, 173-176
Gulf Coast
See Louisiana and Texas
Gulf of Mexico
PDC applications with water-based drilling fluids, (Tech. Paper SPE 15614) SPEDE Jun. 88, 117-124
Planning and operational requirements for a shallow-objective high-angle well, (Tech. Paper SPE 16168) SPEDE Sept. 88, 241-247
Platform: predicting build/drop tendency of rotary drilling assemblies, (Tech. Paper SPE 14768) SPEDE Jun. 88, 177-186

H

Handling
Importance of correct procedures for premium tubular goods, (Tech. Paper SPE 16107) SPEDE Dec. 88, 363-368
Horizontal Well
Cementing: laboratory investigation of, (Tech. Paper SPE 16928) SPEDE Sept. 88, 275-280
Hydraulic Horsepower
Maximum: and impact force on rock surface of hole bottom in jet drilling; hydraulic programs for, (Tech. Paper SPE 14851) SPEDE Mar. 88, 63-68
Hydraulic Lift
Diamond-bit: field application of principles; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 17553) SPEDE Mar. 88, 102
Diamond-bit: field application of principles; discussion of, (Tech. Paper, Discussion SPE 17470) SPEDE Mar. 88, 102
Diamond-bit: laboratory study; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 17553) SPEDE Mar. 88, 102
Diamond-bit: laboratory study; discussion of, (Tech. Paper, Discussion SPE 17470) SPEDE Mar. 88, 102
Hydrogen Sulfide
And water intrusions: methods for field monitoring of oil-based drilling fields for, (Tech. Paper SPE 12120) SPEDE Sept. 88, 296-302

I

Inspection
Ultrasonic: of rotary-shouldered connections, (Tech. Paper SPE 16073) SPEDE Mar. 88, 89-92
Invasion
Gas: and migration in cemented annuli; causes and cures, (Tech. Paper SPE 14779) SPEDE Mar. 88, 77-82
Investments
Optimization of offshore field development to minimize, (Tech. Paper SPE 16297) SPEDE Dec. 88, 403-410
Italy
Field results: microcomputer program for prediction of bottomhole assembly trajectory, (Tech. Paper SPE 15285) SPEDE Jun. 88, 167-172

J

Jet Drilling
Maximum hydraulic horsepower and impace force on rock surface of hole bottom: hydraulic programs for, (Tech. Paper SPE 14851) SPEDE Mar. 88, 63-68
ROP increased from improvement of bottomhole flow field, (Tech. Paper SPE 14857) SPEDE Jun. 88, 204-210
Submerged, nonfree jet: study of pressure attenuation of; and method of calculation for bottomhole hydraulic parameters, (Tech. Paper SPE 14869) SPEDE Mar. 88, 69-76
Job Signatures
Concept of: on-site diagnosis of cement job problems, (Tech. Paper SPE 16649) SPEDE Dec. 88, 374-380

L

Laboratory Studies
Additive effectiveness and contaminant influence on fluid-loss control: water-based muds, (Tech. Paper SPE 14703) SPEDE Jun. 88, 195-203
And theoretical study: of coupling mechanism between longitudinal and torsional drillstring vibrations at bit, (Tech. Paper SPE 15563) SPEDE Mar. 88, 12-18
Centrifuge dewatering process: modern solids control, (Tech. Paper SPE 16098) SPEDE Sept. 88, 315-324
Drilling performance; of PDC bits, (Tech. Paper SPE 15617) SPEDE Jun. 88, 125-135
Gas invasion and migration in cemented annuli: causes and cures, (Tech. Paper SPE 14779) SPEDE Mar. 88, 77-82
Jet drilling: increased ROP from improvement of bottomhole flow field, (Tech. Paper SPE 14857) SPEDE Jun. 88, 204-210
Of cementing horizontal wells, (Tech. Paper SPE 16928) SPEDE Sept. 88, 275-280
Of diamond-bit hydraulic lift: authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 17553) SPEDE Mar. 88, 102
Of diamond-bit hydraulic lift: discussion of, (Tech. Paper, Discussion SPE 17470) SPEDE Mar. 88, 102
Of fatigue-crack growth in drillstring tubulars, (Tech. Paper SPE 15559) SPEDE Dec. 88, 356-362
Of gas solubility in oil-based drilling fluids, (Tech. Paper SPE 15414) SPEDE Mar. 88, 33-42
Of maximum hydraulic horsepower and impact force on rock surface at hole bottom in jet drilling: hydraulic programs for, (Tech. Paper SPE 14851) SPEDE Mar. 88, 63-68
Of oil-based drilling fluids for H2S and H2O intrusions, (Tech. Paper SPE 12120) SPEDE Sept. 88, 296-302

Of pressure attenuation of submerged, nonfree jet: and method of calculation for bottomhole hydraulic parameters, (Tech. Paper SPE 14869) SPEDE Mar. 88, 69-76
Reduction of rotary torque with rubber drillpipe protectors, (Tech. Paper SPE 15565) SPEDE Sept. 88, 269-274
Rotary-shouldered connections: ultrasonic inspection of, (Tech. Paper SPE 16073) SPEDE Mar. 88, 89-92

Laredo Lobo Field

Lignosulfonates
New chrome-free lignosulfonate: performance without environmental concerns, (Tech. Paper SPE 16281) SPEDE Sept. 88, 311-314

Liners
Improved cementation with advanced techniques: operator's experience with North Sea wells, (Tech. Paper SPE 15896) SPEDE Sept. 88, 281-288

Logging
An overview of free-point tools, (Tech. Paper SPE 16154) SPEDE Dec. 88, 351-355

Lost Circulation
Of cement: on-site diagnosis of problem: concept of job signatures, (Tech. Paper SPE 16649) SPEDE Dec. 88, 374-380

Louisiana
Design, testing, and planning considerations for 20-in. record casing string, (Tech. Paper SPE 13433) SPEDE Jun. 88, 187-194
Field monitoring of oil-based drilling fluids for H2S and H2O intrusions: methods for, (Tech. Paper SPE 12120) SPEDE Sept. 88, 296-302
Optimal spacing for casing centralizers: discussion of, (Tech. Paper, Discussion SPE 18730) SPEDE Dec. 88, 419
Young offshore trends: drilling model for, (Tech. Paper SPE 14785) SPEDE Jun. 88, 141-152

M

Measurement
While drilling: evaluating drilling practice in deviated wells with torque and weight data, (Tech. Paper SPE 16114) SPEDE Sept. 88, 248-252

Microcomputer
Program for prediction of bottomhole assembly trajectory, (Tech. Paper SPE 15285) SPEDE Jun. 88, 167-172

Migration
And gas invasion in cemented annuli: causes and cures, (Tech. Paper SPE 14779) SPEDE Mar. 88, 77-82

Mississippi
Downhole solids control: new theory and field practice, (Tech. Paper SPE 14383) SPEDE Mar. 88, 57-62
Field monitoring of oil-based drilling fluids for H2S and H2O intrusions: methods for, (Tech. Paper SPE 12120) SPEDE Sept. 88, 296-302

Models
2D static: microcomputer program for prediction of bottomhole assembly trajectory, (Tech. Paper SPE 15285) SPEDE Jun. 88, 167-172
Anisotropic stress: modeling of stability of highly inclined boreholes, (Tech. Paper SPE 16526) SPEDE Sept. 88, 259-268
BHA: predicting build/drop tendency of rotary drilling assemblies, (Tech. Paper SPE 14768) SPEDE Jun. 88, 177-186
Drilling: for young offshore trends; Louisiana and Texas, (Tech. Paper SPE 14785) SPEDE Jun. 88, 141-152
Drilling: multiple regression approach to optimize operations; Arabian Gulf area, (Tech. Paper SPE 13694) SPEDE Mar. 88, 83-88
Dynamic surge/swab: for pressure predictions, (Tech. Paper SPE 16156) SPEDE Sept. 88, 325-333
Dynamics solids conveyance, (Tech. Paper SPE 14389) SPEDE Dec. 88, 385-394
Finite-element: analysis of surface-casing strain capacity for North Slope operations, (Tech. Paper SPE 16103) SPEDE Sept. 88, 289-295
Mathematical: for maximum hydraulic horsepower and impact force on rock surface of hole bottom in jet drilling; hydraulic programs for, (Tech. Paper SPE 14851) SPEDE Mar. 88, 63-68
Mathematical: of stability of highly inclined boreholes in anisotropic rock formations, (Tech. Paper SPE 16526) SPEDE Sept. 88, 259-268
Pendulum: use in study of slip/stick motion of bit, (Tech. Paper SPE 16659) SPEDE Dec. 88, 369-373
Static and dynamic three-dimensional bottomhole assembly computer, (Tech. Paper SPE 15466) SPEDE Jun. 88, 160-166
Tapered string: new concepts for helical buckling, (Tech. Paper SPE 15470) SPEDE Sept. 88, 303-310
Wolff and deWardt: evaluation of directional survey errors at Prudhoe Bay, Alaska; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18581) SPEDE Sept. 88, 335
Wolff and deWardt: evaluation of directional survey errors at Prudhoe Bay, Alaska; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18582) SPEDE Sept. 88, 335-336
Wolff and deWardt: evaluation of directional survey errors at Prudhoe Bay, Alaska; discussion of, (Tech. Paper, Discussion SPE 18557) SPEDE Sept. 88, 334
Wolff-deWardt: evaluation of directional survey errors at Prudhoe Bay, Alaska; discussion of, (Tech. Paper, Discussion SPE 17467) SPEDE Mar. 88, 103

Monitoring
In field of oil-based drilling fluids for H2S and H2O intrusions: methods for, (Tech. Paper SPE 12120) SPEDE Sept. 88, 296-302

Moorings
And stability and motion analysis: onboard system provides for semisubmersible drilling operations, (Tech. Paper SPE 16067) SPEDE Jun. 88, 153-159

N

New Mexico
Optimal spacing for casing centralizers: discussion of, (Tech. Paper, Discussion SPE 18730) SPEDE Dec. 88, 419

North Sea
Downhole control of deviation with steerable straight-hole turbodrills, (Tech. Paper SPE 14769) SPEDE Mar. 88, 50-56
U.K.: high-pressure extended well tests; operational aspects from a floater, (Tech. Paper SPE 16088) SPEDE Sept. 88, 253-258
Wells: advanced techniques improve liner cementation; an operator's experience, (Tech. Paper SPE 15896) SPEDE Sept. 88, 281-288

North Slope
Operations: surface-casing strain capacity for, (Tech. Paper SPE 16103) SPEDE Sept. 88, 289-295

Norway
Stability of highly inclined boreholes: authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18736) SPEDE Dec. 88, 418
Stability of highly inclined boreholes: discussion of, (Tech. Paper, Discussion SPE 18596) SPEDE Dec. 88, 418
Numerical Solutions
Analysis of helical buckling, (Tech. Paper SPE 14729) SPEDE Jun. 88, 211-216
Analysis of salt drilling techniques for brine-based drilling-fluid systems: Williston basin, (Tech. Paper SPE 15152) SPEDE Mar. 88, 19-32
Bottomhole assembly trajectory: microcomputer program for prediction of, (Tech. Paper SPE 15285) SPEDE Jun. 88, 167-172
Drilling model for young offshore Louisiana and Texas trends, (Tech. Paper SPE 14785) SPEDE Jun. 88, 141-152
Evaluation of directional survey errors: Prudhoe Bay, Alaska: discussion of, (Tech. Paper, Discussion SPE 17467) SPEDE Mar. 88, 103
Evaluation of directional survey errors: Prudhoe Bay, Alaska; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18581) SPEDE Sept. 88, 335
Evaluation of directional survey errors: Prudhoe Bay, Alaska; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 18582) SPEDE Sept. 88, 335-336
Evaluation of directional survey errors: Prudhoe Bay, Alaska; discussion of, (Tech. Paper, Discussion SPE 18557) SPEDE Sept. 88, 334
For helical buckling: new concepts for, (Tech. Paper SPE 15470) SPEDE Sept. 88, 303-310
Fracture-gradient prediction: offshore wells, (Tech. Paper SPE 15105) SPEDE Jun. 88, 136-140
Hydraulic lift: laboratory study of; authors' reply to discussion of, (Tech. Paper, Rebuttal SPE 17553) SPEDE Mar. 88, 102
Hydraulic lift: laboratory study of; discussion of, (Tech. Paper, Discussion SPE 17470) SPEDE Mar. 88, 102
Of bottomhole-assembly vibrations: induced by excitation mechanisms and resonances, (Tech. Paper SPE 15560) SPEDE Mar. 88, 93-101
Of dynamic surge/swab pressure predictions, (Tech. Paper SPE 16156) SPEDE Sept. 88, 325-333
Of maximum hydraulic horsepower and impact force on rock surface at hole bottom in jet drilling: hydraulic programs for, (Tech. Paper SPE 14851) SPEDE Mar. 88, 63-68
Of optimization of offshore field development to minimize investment, (Tech. Paper SPE 16297) SPEDE Dec. 88, 403-410
Of penetration-cost-objective function: applied to optimized drilling; preliminary investigation on, (Tech. Paper SPE 14849) SPEDE Dec. 88, 411-417
Of pressure attenuation of submerged, nonfree jet: and method of calculation for bottomhole hydraulic parameters, (Tech. Paper SPE 14869) SPEDE Mar. 88, 69-76
Of slip/stick motion of bit, (Tech. Paper SPE 16659) SPEDE Dec. 88, 369-373
Predicting build/drop tendency of rotary drilling assemblies, (Tech. Paper SPE 14768) SPEDE Jun. 88, 177-186
Static and dynamic three-dimensional bottomhole assembly trajectory, (Tech. Paper SPE 15466) SPEDE Jun. 88, 160-166
Theoretical study of a coupling mechanism between longitudinal and torsional drillstring vibrations at the bit, (Tech. Paper SPE 15563) SPEDE Mar. 88, 12-18
To solids-conveyance dynamics and shaker performance, (Tech. Paper SPE 14389) SPEDE Dec. 88, 385-394

O

Offshore
Field development: optimization to minimize investment, (Tech. Paper SPE 16297) SPEDE Dec. 88, 403-410
Louisiana and Texas: drilling model for young trends, (Tech. Paper SPE 14785) SPEDE Jun. 88, 141-152
Wells: fracture-gradient prediction for, (Tech. Paper SPE 15105) SPEDE Jun. 88, 136-140
Offshore Drilling
Gulf of Mexico: planning and operational requirements for a shallow-objective, high-angle well, (Tech. Paper SPE 16168) SPEDE Sept. 88, 241-247
Gulf of Mexico: predicting build/drop tendency of rotary drilling assemblies, (Tech. Paper SPE 14768) SPEDE Jun. 88, 177-186
Top-drive drilling system evaluation, (Tech. Paper SPE 16064) SPEDE Mar. 88, 43-49
Offshore Operations
Extended high-pressure well test aspects from a floater, (Tech. Paper SPE 16088) SPEDE Sept. 88, 253-258
Semisubmersible drilling operations: onboard system provides stability, mooring, and motion analysis for, (Tech. Paper SPE 16067) SPEDE Jun. 88, 153-159
Oil-Based Muds
Gas solubility in: experimental study, (Tech. Paper SPE 15414) SPEDE Mar. 88, 33-42
Methods for field monitoring for H2S and H2O intrusions, (Tech. Paper SPE 12120) SPEDE Sept. 88, 296-302
Optimization
Of drilling: preliminary investigation on objective function of penetration cost applied to, (Tech. Paper SPE 14849) SPEDE Dec. 88, 411-417
Of offshore field development to minimize investment, (Tech. Paper SPE 16297) SPEDE Dec. 88, 403-410
Optimizing Techniques
In drillig operations: multiple regression approach; Arabian Gulf area, (Tech. Paper SPE 13694) SPEDE Mar. 88, 83-88
Spacing for casing centralizers: discussion of, (Tech. Paper, Discussion SPE 18730) SPEDE Dec. 88, 419
Oscillations
Torsional: caused by slip/stick motion of bit, (Tech. Paper SPE 16659) SPEDE Dec. 88, 369-373

P

Parameters
Bottomhole hydraulic: study of pressure attenuation of submerged, nonfree jet and method of calculation for, (Tech. Paper SPE 14869) SPEDE Mar. 88, 69-76
Penetration
Cost: applied to optimized drilling; preliminary investigation on objective function of, (Tech. Paper SPE 14849) SPEDE Dec. 88, 411-417
Rate increased in jet drilling from improvement of bottomhole flow field, (Tech. Paper SPE 14857) SPEDE Jun. 88, 204-210
Rate: downhole solids control; new theory and field practice, (Tech. Paper SPE 14383) SPEDE Mar. 88, 57-62
Performance Predictions
Of PDC bits: laboratory drilling performance, (Tech. Paper SPE 15617) SPEDE Jun. 88, 125-135

Pipe
Helical buckling: analysis of, (Tech. Paper SPE 14729) SPEDE Jun. 88, 211-216
Locating the lowest free point in string: an overview of tools for, (Tech. Paper SPE 16154) SPEDE Dec. 88, 351-355
Planning
And design and testing considerations for 20-in. record casing string, (Tech. Paper SPE 13433) SPEDE Jun. 88, 187-194
And operational requirements: shallow-objective, high-angle well in Gulf of Mexico, (Tech. Paper SPE 16168) SPEDE Sept. 88, 241-247
Of directionally drilled wells: interactive computer graphics system improves; East Wilmington field, (Tech. Paper SPE 16173) SPEDE Jun. 88, 173-176
Pressure Behavior
Attenuation of submerged, nonfree jet: method of calculation for bottomhole hydraulic parameters; study of, (Tech. Paper SPE 14869) SPEDE Mar. 88, 69-76
Dynamic surge/swab predictions, (Tech. Paper SPE 16156) SPEDE Sept. 88, 325-333
High: extended well; operational aspects from a floater, (Tech. Paper SPE 16088) SPEDE Sept. 88, 253-258
Production
Riser: improving wellhead performance with programmed cement shortfall, (Tech. Paper SPE 16617) SPEDE Dec. 88, 381-384

Fatigue-crack growth in drillstring: experimental investigation of, (Tech. Paper SPE 15559) SPEDE Dec. 88, 356-362
Premium type: importance of correct running and handling procedures for, (Tech. Paper SPE 16107) SPEDE Dec. 88, 363-368
Turbodrill
Steerable straight-hole: downhole control of deviation with, (Tech. Paper SPE 14769) SPEDE Mar. 88, 50-56

U

University Block 31 Field
See Texas

V

Vibrations
Of bottomhole assembly: induced by excitation mechanisms and resonances; study of, (Tech. Paper SPE 15560) SPEDE Mar. 88, 93-101
Of longitudinal and torsional drilling at the bit: experimental and theoretical study of a coupling mechanism between, (Tech. Paper SPE 15563) SPEDE Mar. 88, 12-18

W

Water
And H2S intrusions: methods for field monitoring of oil-based drilling fluid for, (Tech. Paper SPE 12120) SPEDE Sept. 88, 296-302

Water-Based Muds
Fluid-loss control in: additive effectiveness and contaminant influence on, (Tech. Paper SPE 14703) SPEDE Jun. 88, 195-203
New chrome-free lignosulfonate thinner for: performance without environmental concerns, (Tech. Paper SPE 16281) SPEDE Sept. 88, 311-314
PDC applications in Gulf of Mexico, (Tech. Paper SPE 15614) SPEDE Jun. 88, 117-124
Well Completion
Improving wellhead performance with programmed cement shortfall, (Tech. Paper SPE 16617) SPEDE Dec. 88, 381-384
Wellheads
Performance: improving with programmed cement shortfall, (Tech. Paper SPE 16617) SPEDE Dec. 88, 381-384
Williston Basin
Analysis of salt drilling techniques for brine-based drilling-fluid systems, (Tech. Paper SPE 15152) SPEDE Mar. 88, 19-32
Wyoming
Downhole solids control: new theory and field practice, (Tech. Paper SPE 14383) SPEDE Mar. 88, 57-62
